

# EVO™ Spray

Big Features. Small Price

Experience pulsing nozzle technology by adding EVO Spray, the Capstan AG system available for most sprayer types, and achieve the Blended Pulse accuracy and uniformity in your application.

*The in-cab user interface allows for adjustability to application parameters and offers a series of operational modes.*

EVO Spray is shipped ready to install on your machine, using preset configurations from the factory.

**EVO Spray offers a simple cost-effective Blended Pulse system without sacrificing the benefits.**

## EVO Spray Benefits

- Drift Control through Rate and Pressure
- Boom Section Control with Turn Compensation
- Rate Stabilization using Rate Sync
- Real-Time System Feedback & Diagnostics
- Runs up to 16 Sections.

Application Systems for Professionals™
