

Achieve optimal results with the breakthrough technology of SwathPRO - Aerial individual nozzle spray control system by CapstanAG.

Efficiency continues with the reduced-drag design of the boom and integrated coils located inside the shells.

ProMaker profile generating software aids in building in-flight selectable profiles that can range from full boom, to cleaning up edges in highly sensitive areas in your fields.

No need to land to reconfigure your system.
Optimized application at the push of a button.

SwathPRO Features

- PROMAKER PROFILE GENERATOR SOFTWARE
- ELECTRIC SOLENOID CONTROL PER NOZZLE
- UP TO 7 NOZZLE PATTERN PROFILES
- INTEGRATED SWATHPRO BOOM
- IN-COCKPIT USER INTERFACE

Performance

Compensate for Pattern Disturbances on Demand

On-The-Fly Spray Profile Changes

Change Pressure without Changing Flow

Instantaneous ON/OFF Nozzle Control

Nozzle-by-Nozzle Flow Control

Crosswind Compensation

Drift Mitigation

Value

Increased Acreage per Tank

Compatible With Industry Standard Tips

Increase Application Productivity

Uniform Application Across Entire Swath

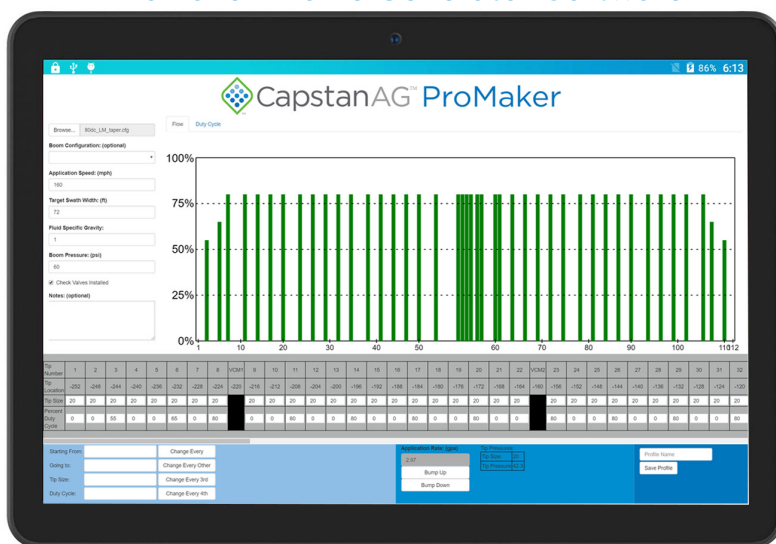

Accurately Spray in Hard to Apply Areas

Immediate System Performance Feedback

Accurate Reduced Boom Width for Regulated Applications

ProMaker Profile Generator Software
